Campaign for Tobacco-Free Kids, December 2, 2008 / Eric Lindblom

Notes: Federal Smoking Medicaid Costs are federal expenditures within the state to cover the federal share of in-state Medicaid expenditures caused by smoking. Other Federal Smoking-Caused Costs are estimated amounts that each state's taxpayers pay to cover their share of total non-Medicaid federal nationwide smoking-caused expenditures. Taxpayers burden equals the cost to taxpayers in each state to cover all smoking-caused state government health expenditures and their share of payments to cover all smoking-caused federal government health expenditures. No non-health costs included in tax burden other than smoking-caused Social Security Survivors Insurance (SSSI) payments. FY2009 tobacco prevention spending includes state and federal funds. Estimated FY2009 state tobacco settlement revenues include the tobacco settlement bonus payments expected to be included in annual MSA payments made to states in April 2009 and assume that the cigarette companies will withhold a portion of their payments based on a claimed non-participating manufacturers adjustment, just as they did in 2008.
