

Help Tell The Story

We invite you to participate in a very important survey of farmers in the Chesapeake Bay watershed.

Help Tell The Story

Pennsylvania agriculture has done much to improve water quality in our local rivers and streams and the Chesapeake Bay. Yet that positive story is often not told.

Now is the time for farmers to tell that story!

You will soon get a mailing from the Penn State Survey Research Center inviting you to participate in a very important survey of farmers in the Chesapeake Bay watershed. This survey will allow farmers to report conservation practices implemented on their farms so agriculture can get the credit it deserves for improving water quality. Information included in the mailing will further describe the survey and provide details of how you can participate.

Look for a letter in the mail from the Penn State Survey Research Center within the next few weeks.

This publication is available in alternative media on request.

Penn State is an equal opportunity, affirmative action employer, and is committed to providing employment opportunities to all qualified applicants without regard to race, color, religion, age, sex, sexual orientation, gender identity, national origin, disability or protected veteran status.
